Teema: GUIDANCE SOUGHT ON VIRTUAL ASSET SERVICE PROVIDER LICENSING

Good Day

I represent Bistox Digital Currency Exchange, a Centralized Digital Currency Exchange commonly classified as a Virtual Asset Service Provider (VASP) and currently regulated by the Lithuanian Financial Crime Investigation Service (FCIS). We would like to expand our market reach to a more global audience. In doing so we are considering seeking further licensing from the Mauritius Financial Services Commission (FSC). The FSC has recently introduced a new VASP licensing regime that is quite comprehensive and robust.

It is the purpose of this email to find out whether or not your institution would recognize the Mauritian license and allow us to operate within your jurisdiction.

I kindly request your guidance as to whether we would need to seek additional licensing from your organization or the licenses we are pursuing would be sufficient to operate within your jurisdiction?

Expectantly looking forward to your candid response.

Best Regards

OPERATIONS TEAM
